

AMENDMENTS TO THE CLAIMS

1-39. (Canceled)

40. (Previously Presented) A method for recording an event, comprising:
obtaining a first set of visual data associated with the event using a first recording unit;
obtaining a second set of visual data associated with the event using a second recording unit; the second recording unit being physically separate from the first recording unit;
transmitting the first set of visual data to the second recording unit.

41. (Currently Amended) A method for recording an event as recited in Claim 40, further comprising displaying the first set of visual data on the second recording unit.

42. (Currently Amended) A method for recording an event as recited in Claim 40, wherein the first set of visual data is transmitted wirelessly to the second recording unit.

43. (Currently Amended) A method for recording an event as recited in Claim 40, wherein the first set of visual data is transmitted wirelessly to the second recording unit, through a transmission channel select from a plurality of transmission channels.

44. (Currently Amended) A method for recording an event as recited in Claim 40, further comprising transmitting an identifier indicating an origin of the first set of visual data.

45. (Currently Amended) A method for recording an event as recited in Claim 404, further comprising storing the first set of visual data and the second set of visual data.

46. (Currently Amended) A method for recording an event as recited in Claim 404, further comprising selectively storing one of the two sets of visual data.

47. (Currently Amended) A method for recording an event as recited in Claim 404, wherein the first set of visual data sent to the second recording unit is compressed.

48. (Currently Amended) A method for recording an event as recited in Claim 404, further comprising coordinating between the first recording unit and the second recording unit to synchronize the first set of visual data and the second set of visual data.

49. (Currently Amended) A method for recording an event as recited in Claim 404, further comprising transmitting audio data from one of the recording units to the other.

50. (Currently Amended) A method for recording an event as recited in Claim 404, further comprising displaying the first set of visual data on the second recording unit and switching to display the second set of visual data on the second recording unit.

51. (Previously Presented) A recording unit for recording an event, comprising:

a data recorder configured to obtain a first set of visual data associated with the event using a first recording unit; and

a transmitter coupled to the data recorder, configured to transmit the first set of visual data to another recording unit configured to obtain a second set of visual data associated with the event.

52-53. (Cancelled)
